**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Response to Amendment***

1. Applicant's remarks filed 3/18/02 have been entered and carefully considered. Applicant's arguments are not found persuasive of patentability for reasons set forth herein below.

***Claim Rejections - 35 USC § 103***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Light et al (5514181), as set forth in the last action.

Applicant has not amended the claims in an attempt to overcome the prior art. Applicant argues that it would not have been obvious to use collagen fibers to form the nonwoven layer because Light requires that said fibers be formed of synthetic materials. Applicant further argues that such a modification would destroy the invention of light. It is the examiner's position, however, that light does not require said fibers to be synthetic and that the use of collagen fibers would have been an obvious modification based on the teachings of Light. Light describes several materials, which may form said fibers (col. 3, lines 1-11). This passage does not state that the material must be synthetic. Moreover, it discloses regenerated cellulose, which is a semi-synthetic material. Light does teach that said fibers may be synthetic and that synthetic fibers are preferred; however, Light clearly teaches that the nonwoven layer can be made from the same

material as the film, i.e. collagen (col. 4, lines 64-66). Applicant argues that this phrase is limited to mean that only the materials of the film layer can be modified to match the nonwoven layer. However, Light provides no support for this strict interpretation of the passage. Light also teaches that collagen is preferred over synthetic materials because of its "well known wound-healing properties (col. 2, lines 26-34)." Light also teaches that said fibers can provide "high-strength (col. 1, lines 58-60)." Said rejection is maintained from the last action.

### ***Conclusion***

**4. THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
